The product's benefits

Installation

- The drawer is completely equipped. Everything is positioned and mounted in the drawer. The pigtails are stripped and inserted in the trays. The drawer is prepared for the termination of a max. of 96 fibres. The drawer is prepared to handle 4 separate cassettes of 24 fibres.

Usage

- The positioning of the 19" mounting handles is adjustable. Minimum position is 55mm from the front of the drawer. Identification cassettes white with black overprint.

Avantages

- Simple patching with optimized patch and cable management
- Simple maintenance with front loaded panels and sliding forward function
